## ANGELL AVOIDED THE TRAP

Tells of His Duel of Wits With a Spy of the Sultan of Turkey at Constantinople.

In the diplomatic service, a man must always keep his wits keen and ready for use. A case in point is supplied by James Burrill Angell, in his "Reminiscences." In this anecdote of his sojourn in Constantinople, as minister from the United States:

The spies of the sultan were everywhere. A Turk told me that the spy business was the most prosperous of all. I was assured that spies were sitting at the dinner tables of the principal hotels, to overhear the conversation of the guests. With one exception whose visits I had been warned, I had an amusing interview.

He was a handsome, dignified Arab, who had been in England long enough to talk English fairly well. He introduced himself to me by saying he had been mayor of Jerusalem, and was now trying to procure from the government a concession for the construction of a system of waterworks for that city.

He regretted—so he informed me—to find that the government was so corrupt that he had no hope of securing the concessions except by bribing a whole row of officials. It refreshed him to turn from those representatives of corrupt and tyrannical government and pay his respects to the representative of a pure and honest democracy.

Supposing his object to be to draw from me some remark derogatory to the Sultan, which he could report to my disadvantage, I remarked that a monarchy presided over by a just sovereign was a very edifying spectacle, and that even in republics it must be admitted that corrupt men were sometimes found in office.

He seemed surprised, and proceeded to eulogize republican government. I continued my commendations of enlightened monarchies.

The conversation ran on in this way for half an hour, when he bade me adieu—but, as I flattered myself, without any game for his bag.—Youth's Companion.
